just the number

[Entry conditions are here](#)

Tick to confirm you accept:  \*

submit

Total is £ 0

This image is the initial entry form (in the mobile phone it has a light green colour)

When you start, get your EA number ready (if you have one) also your credit/debit card.

Most of the fields are obvious. Red stars mean that we need you to give a real value to them.

When you put your cursor in the Date of Birth field, you will get a calendar-style entry method. It fires when you select the day, so do year and month first.

You can repeat the entry if you get it wrong, or just type a correction into the box.

We have not forced you to enter a mobile number and name and number of your next of kin, but they are really important details that you should provide.

Email address is really important as our choice of contact method

‘Affiliated Club’ means a real running club, see details on homepage if unsure

### Click ‘Submit’ when ready

If you leave out a required field the form will alert you but once you get it complete your details will be immediately databased.

‘Submit’ will now have a different text and will be unclickable: the form will have more detail below so SCROLL DOWN. The total you are paying will have passed through and you can click the next orange button to go forward to PayPal. (You can click to get our Bank Details instead if you wish to pay by Bank Transfer- if you do you can end your session now, it’s done)

If you go through to PayPal however, as most people do, you will be offered PayPal’s member system- you can avoid this simply by scrolling down and ‘pay by credit/debit card’ is available.

After your payment, you will get a confirmation from rotherham10k website with your transaction code. PayPal will also email you with a formal receipt.

These are a sign that your entry has been successful: your name will soon appear in the List Of Entries (after our bank confirms)

If you have any problems using this system, email for aid to [website@rotherham10k.com](mailto:website@rotherham10k.com)

Otherwise, entries which are terminated before the payment is made will be kept as ‘incomplete’ for a week or two but after that will be automatically deleted.
